AIM:

Design and configure on Internetwork

using DHCP server.

student observation:

1) write down the key features of configuring

router.

⊕ Router configuration on:

→ Snabling DHCP server to auto assign

IP address.

→ providing conn. to the devices.

○ DHCP server configuration:

→ Automatic ip address assignment for

device joining the network.

→ setting up pool ranges of DHCP server.

2) what is the significance of DHCP

server in internet.

- A dynamic host configuration protocol server simplifies IP address.

o Automated IP address allocation.

o No duplicate IP address.

- supports large scale networks.

Result:

Thus the design and configuration of DHCP server is executed.
